about us

Our **Aim**

Our aim is to improve the life chances and experiences of both children and adults by engaging them in effective, sustainable teaching and learning within the Computer Science, E-Safety and MFL curriculum.

We endeavor to do this by providing top quality consultancy which is relatable, easily implemented into every day practice. and moreover

Our **Approach**

Our approach is simple. Our primary objective is the practicality and sustainability of our recommended practices.

We pride ourselves in providing a personal and easily accessible service.

We always ensure that we:

- Listen to and work with our clients
- Carefully identify the needs of the client
- Ensure the most appropriate package is delivered in order
- to maximize impact
- Coach & mentor our client
- Are easily contactable to answer questions during consultation period.

Computer Science
Packages

At Clear Steps Plus Education we believe every child should have the support they deservce to reach their full potential in today's society.

Computer Science technology advances the world around us is becoming smaller and the need for computer science skills is becoming greater. However it is very apparent that there is a shortage of specialists in this subject area. Moreover teachers are now finding themselves outside of their comfort zone and are required to basically retrain in their first subject in order to deliver effective, engaging teaching and learning of computer science in their classrooms.

Discounts available when more than 5 lessons purchased.

E-Safety
Packages

At Clear Steps Plus Education we believe every child should know how to be aware and safe, whilst fully engaging in the advantages that today's digital society offers.

It can be a daunting task ensuring that all of the IT systems within your school are fully compliant with OFSTED expectations, but moreover ensuring that whilst in your care children are kept safe when using digital resources. This is a task that needs review constantly, with fully embedded standard operating procedures in place that ALL staff and students understand. Most schools leave this to the Head of ICT/Computer Science, however most HODs will not have the time to fully implement and ensure that system is robust and fit for purpose.

We at Clear Steps Plus Education can offer effective support providing consultancy which will have a very clear positive impact on the E-Safety and E-learning of your school IT systems and the protection of both your students and staff. We also offer opportunites to increase your parental engagement by offering parent workshops e.g. Bring your own device, whereby our consultants will not only deliver training but show parents how to set privacy and child safety settings on this own devices.

2 hour workshop at £200

MFL
Packages

Never has there been a time in human history in which mastering foreign languages is not only desirable, but truly essential for business, politics and education.

In today's ever more globalised society, having a second language is becoming more and more essential in today's ever competitive job market and in the university selection process.

Evidence shows that the earlier we acquire a second language then it can then lead to an enhanced readiness to learn other languages at a later stage and can help foster positive attitudes towards other languages and cultures.

Early learners tend to be more intuitive, less anxious and better at acquiring the sounds and rhythms of the new language.

Starting early allows for more time for language learning overall and a sustained experience with the potential to lead to higher levels of proficiency at the end of secondary school.

The primary curriculum provides many opportunities which can be exploited for language learning. This is one of the particular benefits of starting early.

The early introduction of literacy in the new language can provide an important focus as well as support for learning.
